***Election/Restriction***

1. Claims 17-18 and 20-37 are containing claims directed to the following patentably distinct species of the claimed invention:

Embodiment 1 drawn to the semiconductor topography, wherein all layers of the SONOS structure comprise deuterium.

Embodiment 2 drawn to the semiconductor topography, wherein at least one but less than all layers of the SONOS structure comprise deuterium.

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

4. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

5. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record
